Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1- rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 recites at least one second contact module. It is not clear how plural contact module would be referred to as a second contact module.
4. Correction/Clarification is requested.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
2. Claims 1- rejected under 35 U.S.C. 102(b) as being anticipated by Kha et al. (US 20040097138 A1).

As per **claim 1**, Kha discloses a first contact module with plural pairs of connectors for wires (fig. 1, para. 41) for a dsx module in a cross connect system (carrier)

Art Unit: 2614

for coupling cables (fig. 2).(fig. 5f). The system comprises a functional modules fig. 5f with pairs of contacts made to couple to the chassis (first contact module). The system comprises the functional module (para. 64) further being coupled to a second contact module (the testing device via the BNC connection in front of the functional module) (telephone company equipment, para. 65).

As per **claims 2,10**, Kha discloses the use of disconnection points with pairs of contacts to couple to the first contact module (fig. 14).

As per **claims 3,4,14**, there is a PCB and electrical circuit used in the dsx module (para. 12,16).

As per **claims 5,6**, the dsx modules can split or test the signal paths.

As per **claim 7,16**, they are rejected as per the claim 1 rejection.

As per **claim 8,15**, the dsx module can protect the signal path via the connections as it is in series with the signal path (protection component/module).

As per **claim 9**, the switches of fig. 16 inherently require power and ground (grounding member) for the purpose of biasing the switches.

As per **claim 11**, the connection members of the disconnection connectors as shown in fig. 14 are accessible at the rear of the module (fig. 2).

As per **claim 12**, the disconnection connectors are also accessible from the front of the module (abstract).

As per **claim 13**, all components/modules/chassis that are coupled together are configured similar.
